Mohali, Punjab - 140301, India

Motivated and technically driven B.E. Computer Engineering student with strong skills in full-stack development and Python, currently expanding expertise in Machine Learning and Deep Learning. Experienced in leading teams as a Student Committee Head at Thapar Polytechnic College, demonstrating initiative, collaboration, and problem-solving abilities. Eager to apply technical knowledge and leadership experience to deliver impactful solutions in software engineering or data analytics roles.

SKILLS

- **Programming Languages:** Python, C++, JavaScript, TypeScript, OOP Principles.
- **Databases:** SQL, MongoDB, Postgres, Redis, MySQL.
- **Technologies:** Django, React, Flask, Selenium, Celery.
- **Cloud:** AWS, Oracle.
- **DevOps:** Git, Docker, CI/CD pipelines, Security, Agile.

WORK EXPERIENCE

Internshala

Jul 2024 - Aug 2024

Internshala Student Partner

- Promoted Internshala programs and internship drives across campus and social media channels.
- Organised awareness campaigns, webinars, and referral activities to increase student participation.
- Developed communication and marketing skills by interacting with diverse student groups.
- Assisted in building a community of proactive learners and interns within the campus network.

EDUCATION

Thapar Institute of Engineering and Technology, Patiala

B.E Computer Engineering

June 2024 - Present

Current Aggregate

Thapar Polytechnic College, Patiala

Diploma in Computer Science and Engineering

Aug 2021 - Jun 2024

Final Aggregate - 78.5%/100

Vivek High School, Mohali

10th

June 2021

Final Aggregate - 82.4%/100

RELEVANT PROJECTS

Swasthya Setu (Team Project - Role: Full Stack Development)

AI Medical Diagnostics Web Application

- Built a full-stack web platform integrating Django backend, REST APIs, ReactJS, and AI inference services.
- Designed database schemas and backend logic for managing medical tests, predictions, and risk levels.
- Integrated deep learning inference into production workflows with secure data handling and API-driven architecture.

MediMind (Team Project - Role: Full Stack Development)

Smart AI Inventory Management System

- Built a full-stack healthcare analytics platform using React, Django, REST APIs, and PostgreSQL
- Automated invoice OCR → inventory sync → real-time dashboards, eliminating manual stock handling
- Developed scalable backend services for sales tracking, alerts, analytics, and role-based access
- Implemented ML-driven insights for demand forecasting and intelligent reorder recommendations

GeM Web Scraper (Solo Project)

Automated Tender Data Web Scraper

- Built a Python-based scraper to automate extraction of tender data from the GeM (Government e-Marketplace) portal.
- Automated downloading and organization of bid files, corrigendum, and related documents with full metadata.
- Integrated MongoDB for structured storage and retrieval of tender information, forming the base for a tender management system.

ACHIEVEMENTS & CERTIFICATIONS

- | | |
|---|----------|
| • Cyber AI Hackathon University of Derby Innovation Award Winner | Nov 2025 |
| • SatHack 2025 Finalist | Nov 2025 |
| • Top 10 Ranker in Diploma | Jul 2024 |
| • Silver Medal in Inter-College Football and Badminton Tournament | Apr 2024 |
| • Qualified from Inter-college hackathon for SIH 2023 participation. | Oct 2023 |
| • 4 Course Certifications from Meta, Coursera in Version Control, HTML, CSS and JS foundation | Dec 2023 |
| • NIELIT 6 week Summer Training in AI/ML | Sep 2023 |

Availability: immediate | Willing to relocate: Yes
